Digital security checklists for activists who are overwhelmed by digital security

We're about to see a rise in authoritarianism, state surveillance, and repression of social movements.

As activists, we need to practice heightened digital security to stay safe and protect our communities.

We want to hear from you:

- What works and doesn't work for you?
- What other checklists and/or information would you like to see on the site?
- Who should we share this site with?
